Dear Premier Kenney,

As a Citizen of Alberta, I am concerned that the Government of Alberta is being misled by Dr. Hinshaw regarding the effectiveness of the measures recently imposed. I am concerned that stripping healthy people of their rights, is not an effective strategy, as opposed to taking more and better steps to protect the elderly and people with fatal comorbidities, including providing them known prophylactic treatments such as the Eastern Virginia School of Medicine MATH+ protocol of Methylprednisone, ASA, Ivermectin, Vitamin D, Zinc and Vitamin C. Where the MATH+ protocol has been deployed it has reduced COVID mortality by 400%.

Any deaths arising from your failure to take action in this regard are on your hands.

Now that rapid tests, vaccines, and treatments are available at Long Term Care Homes, the excuse for the lock down has largely dissipated. It is appalling that after what we thought was a heart felt apology that you are again allowing Dr. Hinshaw to destroy Alberta businesses without any evidence that they are causing harm.

I suggest that you read the Great Barrington Declaration where you will find these views are shared by tens of thousands of esteemed physicians, Nobel Laureates, scientists, and even members of AHS, as well as the silent majority of Albertans.

I do not believe that Dr. Hinshaw has adequately considered alternatives to her present orders, nor do I believe that she is qualified to make these decisions. I make this statement based on her stated ignorance of available treatments, her ignorance of the source of 78% of the alleged COVID Cases in Alberta (including the cases being identified by a flawed RT-PCR test), and her refusal to take personal responsibility for increasing suicides, opioid deaths, and economic devastation directly tied to her autocratic orders.

As a "Public Health" official, her blatant disregard for the public health crisis SHE has created with her orders, demonstrates a degree of incompetence that is worthy of her dismissal.

I also request that you personally intercede and demand that Dr. Hinshaw rescind Orders 38, 39, 40, 41 and 42-2020. All of the excuses for these orders are no longer viable. The provincial R value is below 1, hospitals are under no greater load than usual for flu season, and rapid testing at Long Term Care Homes addresses that concern.

If you insist on turning a blind eye to the cruel and unnecessary cancellation of Christmas, please also consider the impact these actions will have on your government in the next election.

Yours truly,

[YOUR NAME]
